before Friday, 21st June 2019

KEY RESPONSIBILITIES

- Organise, plan and implement all actions necessary to achieve maximum maintenance quality whilst satisfying our increasing customer demands
- Ensure budgetary maintenance targets are met, utilising the best available technology, automation and work practices consistent with national and international best practice in the Dairy Industry
- Lead change and continuous improvement programmes in all areas of maintenance to ensure that we get the maximum return from all equipment and activities
- Implement Asset Management Strategies to achieve and improve process efficiencies
- Carry out Engineering Maintenance Audits and Benchmarking studies
- Co-ordinate all maintenance activities for business performance measurement and regulatory authority purposes
- Work as part of a team with other functions / department managers to achieve and maintain the highest quality and hygiene standards throughout the site
- Ensure that all maintenance employees are suitably trained to achieve the highest quality standards
- Carry out any other duties relevant to the business as needs arise
- Drive a culture of continuous improvement in line with our values of trust, team, will to win and customer focus

THE IDEAL CANDIDATE WILL HAVE:

- A relevant 3rd level engineering qualification would be advantageous
- Significant experience in an equivalent role, preferably in the food sector
- Computer literacy and familiarity with computerised preventative maintenance programmes would be a distinct advantage
- Familiarity with the principles of Lean Manufacturing
- A focus on results demonstrating a strong work ethic, with an appetite for change and innovation
- The ability to plan, organise and prioritise work in a busy working environment
- Strong communication and interpersonal skills
- A proven record of leading people
- The ability to work efficiently and effectively on own initiative and as as part of a team
