Employing over 40 people, it is a key stable employer in the local region and this is a fantastic opportunity to join the team and play a key role in its future journey.

Key Responsibilities:

- Integrate as part of the Maintenance team to deliver support for operations.
- Carry out all work keeping safety, quality, and output to the fore.
- Deliver with the other Maintenance team members a reliable centred maintenance function with best practices including preventative maintenance.
- Maintain accurate maintenance data and close out assigned work using the CMMS.
- Install new electrical circuits containment and take part in commissioning process.
- Repair and replace electrical equipment.
- Responsible for electrical inventory
- Install maintain and calibrate industrial instrumentation equipment and related devices
- Periodic testing of electrical circuits
- Participate in the onsite lean initiatives
- Be available for callout in breakdown situations

Requirements:

The ideal candidate will have:

- National craft cert
- Mechanical knowledge and experience in working with pneumatics and hydraulics
- Knowledge of PLC controls is an advantage
- Excellent communication and organisational skills.
- Previous experience within a high-volume food manufacturing environment an advantage
- Experience using a CMMS
- Knowledge of repair and fault finding
- Strong problem solving and decision-making skills
