

Wastewater Treatment Plant Operator

Contract type: Permanent

Location: Aurivo Dairy Ingredients, Ballaghaderreen, Co. Roscommon

Would you like to enter a career with lots of potential?

Look no further.

Aurivo would like to work with you and help kick start your career with us.

We have an opportunity for an ambitious individual to partner with us in managing our environmental responsibilities in the area of wastewater treatment. This a new role that has not only the potential to add value to Aurivo and society, but also to **your future**.

With the ever increasing importance of bettering the environment, the outlook for career opportunities in wastewater management will grow by 12% in the next 7 years.

You don't need formal qualifications to take on the role, but you will do good to have them to advance further in the future.

Aurivo will support you in gaining the necessary Wastewater Treatment / Environmental qualifications by supporting further education time off and paying the costs as you work with us in the role of Wastewater Treatment Operator at our Dairy Ingredients site in Ballaghaderreen.

This is a varied role, and we will also look to support and pay for your professional development while you are carrying it out.

So if you want a fulfilling career with real growth potential, find out more by contacting Bill.Staunton@aurivo.ie

Full details of the role you will initially be required to take on are detailed here, but there will be lots of room for advancement into the future.

Key Responsibilities:

- Operation of the Wastewater Treatment Plant (WWTP) process – mainly outdoor work
- Gain familiarity with all WWTP equipment and processes
- Manage dry sludge production including shunting sludge trailers as required
- Maintaining chemical addition to processes where required i.e. DAF, dewatering and final settlement
- Cleaning and washing of equipment, managing chemical stocks, bunding chemicals and emptying bunds and tanks, and general tidying of the WWTP area
- Perform daily checks of all equipment to ensure correct operation and no blockages
- Take daily water samples and perform daily / weekly monitoring tests required for optimum operation of the plant and as required by the licence
- Manage disposal of waste chemicals and empty IBC's
- Carry out minor repairs, hose changes and clearing of blockages
- Comply with all Health & Safety requirements including working alone procedures.

Requirements:

The ideal candidate will have:

- An environmental / WWTP qualification or be willing to undertake such training
- Hands on practical ability in setting up pumps, connecting hoses and couplings etc.
- HGV driving experience
- Forklift driving experience
- Good computer and report writing skills
- Excellent communication skills
- Must be capable of working alone and on their own initiative.

How to apply:

Aurivo reserve the right to shortlist candidates.
